

DANIEL FRAGA

Experienced software engineer seeking a remote or hybrid position at a dynamic company where I can apply my skills in developing, scaling and maintaining web apps.

WORK EXPERIENCE

SOFTWARE ENGINEER

Los Angeles, CA • 100Devs • 2022 Dec - Present

TypeScript NextJS React Python NodeJS Express MongoDB

- Taught students MERN stack in a 12-month full stack web development bootcamp.
- Launched and led mentoring programs for 100Devs Junior Training. Orchestrating weekly catchup sessions.
- Collaborated with global teams of developers to build 6 responsive modern web applications.

SOFTWARE ENGINEER INTERN

Copenhagen, DK • Spaak.AI • Mar 2024 - Apr 2024

TypeScript NodeJS Express LLM Langchain Slack

- Scraped and curated more than 200 political data sources to enhance a database for training SpaakAI's Language Model (LLM).
- Independently engineered a Language Model (LLM) specifically fine-tuned for the Spaak.ai website.
- Worked closely with founders and the team to leverage collective expertise and meet project milestones.

FULL STACK WEB DEVELOPER

Toronto, Canada • Freelance • Mar 2022 - Present

TypeScript React NextJS

Developed comprehensive full-stack web applications and dynamic websites for a variety of small to medium-sized business clients.

PERSONAL PROJECTS

INVESTMENT HUB

TypeScript React NextJS SQL Trello

Dashboard summarizing SEC filings with AI, stores financial data efficiently, and delivers relevant news.

- Extract and summarize key financial insights from SEC filings using LangChain and ChatGPT.
- Built a data pipeline to efficiently fetch, transform, and store financial data in SQL databases.
- Developed a news feed delivering current news relevant to users' portfolios and investment interests.

WEALTH WISE

TypeScript React MongoDB

Personal finance tool allowing users to visually track investment portfolio and side hustle performance, aiding users journey to financial freedom.

- Leveraging Chart.js to create visualizations that track side hustle performance and portfolio growth trends.
- Building a data pipeline to fetch data from various endpoints and store it in a NoSQL database.
- Integrating Stripe payments and setting up webhooks to process and retrieve payment information.
