

DANIEL FRAGA

Software Engineer translating business requirements into scalable solutions, collaborating in cross-functional teams, and driving innovation across industries and technologies

WORK EXPERIENCE

SOFTWARE DEVELOPER

100Devs • Remote • Dec 2022 - Mar 2024

JavaScript TypeScript NextJS Express Remix

- Worked with **global cross-functional teams** to develop **responsive web applications**, engaging in all stages of the development process.
- Secured a **\$15,000+ contract** with Colossal Media by collaborating with a **team of 10+** to develop **client proposals** and **define project scope**, deliverables, and value propositions.
- Educated students** in **MERN stack development** over 12 months, emphasizing **MongoDB, Express.js, React**, and **Node.js** in a full stack web development bootcamp.

DATA ENGINEER

Remote • Copenhagen, DK • Spaak.AI • Mar 2024 - Apr 2024

JavaScript TypeScript NodeJS Express NextJS

- Facilitated SpaakAI's expansion** into more than 5 countries by curating and scraping 200+ political data sources **using NextJS, Cheerio, Puppeteer, Node.js, and TypeScript**.
- Independently developed** a specialized LLM for SpaakAI's website using **NextJS, TypeScript, Langchain, OpenAI API, and PostgreSQL**, enhancing user engagement and accessibility for cold traffic and potential clients
- Collaborated closely** with SpaakAI's founders and **cross-functional team** to achieve project milestones, providing technical expertise and contributing to a productive team environment.

FULL STACK WEB DEVELOPER

Remote • Mar 2022 - Present

TypeScript React NextJS Python NodeJS MongoDB PostGreSQL

- Designed and developed **full-stack web applications** using **React, Remix, NextJS, Python, PostGreSQL, MongoDB, Tailwind**, and other relevant tools ensuring a seamless user experience and functionality.

PERSONAL PROJECTS

NEXT FRONTIER HUB

Python Remix TypeScript MongoDB GSAP

NextFrontierHub is an **AI-driven** blog that is **fully automated** in data collection, content generation, publishing, and social media marketing for emerging tech investments.

- Automated Data Processing** – **Scrapes** investment data with **Playwright**, **summarizes** using **OpenAI API**, **generates PDFs** with **WeasyPrint**, and stores insights in **MongoDB**.
- AI-Powered Content Display** – Uses **React/Remix** to dynamically present investment insights for a **seamless user experience**.
- Social Media Automation** – **Generates** and posts **AI-driven** Twitter updates and threads to enhance visibility and engagement.
